Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection.

The Status of Claims:

Claims 1-23 are pending.

Claims 1-4, 7, 9, and 16-19 have been rejected.

Claims 5-6, 8, 10-15, and 20-22 are objected.

Claim 23 is allowable.

DETAILED ACTION

Priority

Claims 1-23 are under consideration in the application.

I It is noted that this application claims a benefit of 60/423,473 (11/04/02); the examiner has acknowledged that foreign priority documents, Germany 10229713.4 (7/2/02) has been filed.

Drawings

II None.

Claims 5-6, 8, 10-15, and 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2 and 16-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, the phrase “one polyene group contains at least one cis double bond” is recited. This is vague and indefinite because the term “contains” would mean that there are other components besides the one cis double bond. Therefore, an appropriate correction is required.

In claims 16 and 18, the phrase “one of its variants and/or mutants” is recited. This is vague and indefinite because the specification does not elaborate what “one of its variants and/or mutants” would be for the process. Therefore, an appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1625

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4, 7, and 9 are rejected under 35 U.S.C. 102(a) as being anticipated clearly by Darby et al (J. of Organic Chemistry, 1977,42(11), p.1960-7).

Darby et al discloses the following compound (see page1962, scheme IV):

This is identical with the claims.
